Resolution Copper Water Treatment Plant—Arizona

Performance Associates is developing a computer-based training (CBT) system for the operators and maintenance personnel at Resolution Copper's underground mine water treatment plant. On-line workbooks and tests are an integral part of the system. On-site training instruction will also be involved.

Voskhod Chrome LLP—Kazakhstan

Performance Associates is preparing comprehensive hard-copy operations and maintenance manuals and associated training modules for this chromite concentrator in Kazakhstan.

Yamana Gold Gualcamayo—Argentina

Performance Associates is preparing comprehensive hard-copy operations and maintenance manuals and associated training modules for this heap-leach gold operation in Argentina. Performance Associates will also be conducting on-site operator and maintenance training instruction.

Coeur San Bartolomé—Bolivia

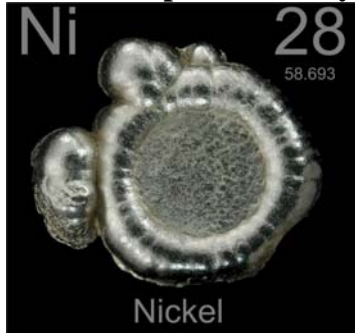

Performance Associates is preparing comprehensive hard-copy operations manuals and associated training modules for this gold mill and Merrill-Crowe plant in Bolivia. Additionally, Performance Associates is preparing preventive maintenance procedures for the plant equipment and will be conducting on-site operator training instruction.

Vale Minera Onça Puma—Brazil

Performance Associates is preparing an integrated computer-based training (CBT) system for the nickel mine and processing plant at Onça Puma in Brazil. The CBT system is accessed via a web browser and incorporates on-line workbooks and tests. Trainee records are automatically updated and tracked by the system. Performance Associates will also be conducting start-up training using the CBT program.

Vale Inco Thompson Refinery—Canada

Performance Associates is developing a SCORM compliant e-learning system for a part of Vale Inco's new material handling system in the electrolytic refinery. The SCORM system will use client-server technology to allow access to the system from a secure internet connection. On-line workbooks and tests are incorporated in the system. Performance Associates' learning management system (LMS) will be used for the data handling.

GoldCorp—Peñasquito

Performance Associates is developing comprehensive plant operating and maintenance manuals, along with associated training modules, for the oxide leach process at GoldCorp's new Peñasquito project in Mexico.

Performance Associates will also conduct on site training for new plant operators prior to initiation of commissioning.
